

MICRO INGREDIENT BATCHING SYSTEMS

MICRO MATE

Chief Agri/Industrial, a division of Chief Industries Inc., introduces a **MICRO INGREDIENT BATCHING SYSTEM**. The design is based on simplicity and ease of operation that will provide years of service while offering improved accuracy in batching of micro-ingredients.

MICRO MATE

Features:

- **Factory assembled and tested for quality and performance, no job site assembly required**
- **304 Stainless Steel Mass Flow Bins – 6, 8, 10 cu. ft. capacity bins available**
- **Standard Models feature systems from 6 to 24 bins**
- **Hinged bin lids with card holders**
- **Interior 45 degree corners to improve product flow and reduced bridging**
- **Interior measuring tape (standard or metric) for inventory calculations**
- **Explosion proof 1 HP motors (230/460V)**
- **Stainless Steel hopper and scale construction**
- **Unique latching inspection ports offer quick access and a dust tight seal**
- **Discharge hoppers of scaling system are equipped with vibrators**
- **3” diameter Stainless Steel augers, designed for positive material shut off**
- **Solid machined Stainless Steel auger shafts for long life and durability**
- **10 gauge Stainless Steel flighting on all augers**
- **230/460 volt 3 phase 60 Hz power requirements**
- **Dust tight electrical enclosures**
- **Readily available standard purchase components**
- **Customer Support Provided 24 / 7**
