

Roof Design:

The Standard Bin Roof is 3/16" plate, sized to fit, and painted silver brite, with a 1" in 12" slope gable design.

Optional Roof Designs are:

- 1/4" Safety Plate
- Curb & Decking to receive a minimum of 3" to 5" maximum of concrete

The roof can also be designed to slope in one direction or to be flat for a headhouse.

The roof deck can be designed to support machine loads and headhouse with multiple floors.

Special coatings available to reduce heat build-up on bin roof can be applied after installation. Proven to reduce temperature inside bin compartment.
